

PROJECTED CAPACITIVE TOUCH PANELS & TOUCH FOILS

7" to 65" Support 5/10 Touch Points

Main Features:

- High Image Clarity
- Free of drift
- Z- Axis pressure recognition
- Strong mechanical strength
- Short response time
- Compact size for easy integration
- Customization available on glass sensor size, driver, accessories.
- Flat touch screen in 10.4", 12.1", 15", 15.6", 17", 18.5", 19", 21.5", 20.1", 22" sizes. Other sizes available on order
- Controllers compatible with Windows family, Linux and DOS

Application:

- Food Processing
- Industrial Automation
- Kiosk
- Medical equipment
- In-vehicle and transportation
- Point of sale terminal (POS)

Technical Parameters :

- COVERED LENS Chemical tempered glass
- FPC Interface line USB Interface
- IC (ILI2301+M2V) (TX30*RX20) 10 point touch; IO Voltage 3.3v
- Working Voltage 5.0v The interrupt way The drop down pulse
- The resolution of the X:1280,Y:800(According to customer requirement)
- For the surface hardness7H
- Euphotic rate of more than 86%
- Not specified tolerances +0.2mm
- Products comply with RoHS standard.

Product Warranty :

- Sensor for 1 year
- Controller for 1 year

1. Introduction

1.1 Definition

It's a kind of projected touch panel with USB interface. It can support win7,win8 OS and can realize 10 finger point touch

1.2 Features and General Specifications

Touch screen panel technical specification

Item	Contents	Unit
Type	Projected Touch Panel	
Total Thickness	2.4±0.2/ 3.9±0.2	mm
Interface	USB	
Number of Touch Points	5/10	
Input Voltage	5V----	
Response Time	10ms	
Pressure Endurance Value	<10g	
Input	Hand writing or capacitive Pen	
Transmittance	>90%	
Surface Hardness	≥6H	
Usage	The specification is applied to transparent and handwriting input capacitive touch panels	
Application	It's applied in ordinary electric equipments and automatic office facilities.
